Our Commitment to Social Value

At Legastat, we believe that successful businesses have a responsibility to create positive and lasting benefits for their people, communities and the environment.

As a trusted litigation support partner, we are committed to delivering social value through the way we operate our business, support our employees, work with clients and contribute to the wider community. Our approach is centred on three key areas:

People

We are committed to creating an inclusive, supportive and rewarding workplace where employees are treated fairly, given opportunities to develop and encouraged to reach their full potential. We promote equality, diversity and wellbeing throughout our organisation.

Community

We actively support charitable initiatives and community programmes that make a positive difference. We seek to create opportunities through skills development, training, employment initiatives and partnerships that benefit the communities in which we operate.

Environment

We recognise our responsibility to minimise our environmental impact and continually improve our sustainability performance. We support responsible resource management, waste reduction, recycling initiatives and measures designed to reduce our carbon footprint.

Ethical Business

We are committed to operating with integrity, transparency and accountability. We maintain high standards of corporate governance, promote ethical business practices and work responsibly with our clients, suppliers and stakeholders.

We regularly review our activities and commitments to ensure we continue to deliver meaningful social value for our clients, our people and society as a whole.

Human Rights

Legastat is committed to conducting business ethically and responsibly. We support and respect internationally recognised human rights and seek to ensure that all individuals are treated fairly, with dignity and respect. This commitment is reflected throughout our employment practices, equality and inclusion initiatives, whistleblowing arrangements, ethical business standards and our approach to preventing modern slavery within our business and supply chain.
